- Built a circuit that converts DC to AC circuits using a circuit board with resistors, and a soldering iron
- Created a Desktop calculator application using visual studio C++ Windows Form application in May 2016
- In November 2016 I completed a personal Website project with the programming languages HTML, CSS, and JavaScript. Visit website copy here or hold ctrl/command and click the link <https://bonisq.000webhostapp.com>
- Training boot camp which consist of HTML, CSS, Bootscrap, JavaScript with JSON and AJAX, and C#, for Software Engineering

WORK EXPERIENCE

DB Schenker

June 2017

Austin, TX

Shipping and Receiving

- Utilizes SAP to display package's data to fill online inspection form in a timely manner
- Check package in detail for any issues that may lead to failed inspection
- Provide assistance if needed, and keep environment clean

Revature

April 2017-May 2017

Reston, VA

Software Engineer Trainee

- Studied the Senior Trainer HTML, CSS, JavaScript, and C# given assignments
- Used Visual Studio Code to program and build a web portfolio that consists of 6 pages index, about me, favorite actor, technology I'm interested in, a web application, and contact form
- Learned how to use the terminal with git-bash.exe

Best Buy

May 2016

Houston, TX

Volunteer

- Engage into computer issues geek squad may have solving client's request
- Diagnose and helped update geek squad's website by adding new pictures using visual studio code
- Assisted employee by installing the given application on the computer the client provided

Aerotek

June 2013 – Jan 2014

Austin, TX

Material Handler

- Pulled orders for delivery or pickup
 - Loaded and unloaded vendor and common carrier vehicles
 - General forklift maintenance and reported maintenance necessities
 - Tracked and monitored inventory levels
 - Completed additional duties and responsibilities as required or assigned
- Certified forklift driver

Flextronics

April 2011- May 2013

Houston, TX

IT Technician

- Install new hardware and software to computers
- Setup equipment for the operating system
- Replace old computers with new or more efficient operators
- Diagnose and repair any issue computers may have
